

Your wedding reel. Delivered before the celebration ends.

A basic website with a luxury soul. No app. No clutter. Just a premium booking machine that turns Instagram love into paid, date-locked bookings.

Capture - Edit - Deliver - Instantly. Shot on iPhone at weddings and events in Hyderabad. Edited on-site. First reel delivered the same day, before the event ends.

Primary action everywhere: Book Your Date

THE PROMISE

Speed you can feel.
Reel tonight, not in 2 months.

THE FEELING

Premium like a luxury wedding brand. Calm, warm, safe.

THE JOB

Visit → trust → pick a package
→ pay advance → date locked.

For: Owner / decision-maker, designer and developer. Read Sections 1-4 for vision, Sections 6-8 to design, Sections 10-14 to build and test. Open Questions in Section 17 must be answered before development starts. No personal names or phone numbers appear in this document by design.

The Feeling comes **before the features**

A family does not book a reel maker the way they book a cab. They are handing over their biggest day - a day that will never come again - to someone they found on Instagram. The website has one emotional job: in the first ten seconds, make them feel, *these people understand what this day means, they are premium and organised, and I will see my reel tonight while everyone is still together.*

That is why this is not a cheap freelancer page and not a tech app in disguise. The design language is a luxury wedding editorial - dark cinema, ivory silk, champagne gold - slow and calm on the surface, with a ruthlessly simple booking engine underneath. Every extra feature that does not increase trust or bookings has been cut. Few pages. Flawless execution.

Three design principles govern every decision: (1) **Speed is visible** - delivery time, real reels playing, and a booking that finishes in under 3 minutes. (2) **Premium is restraint** - whitespace, serif headlines, one gold accent, no clutter, no discount shouting. (3) **Trust is proof** - real work, real reviews, one honest price everywhere. If a design choice conflicts with these, these win.

Current state - verified 4 October 2026

Fact	Today	What the website fixes
Instagram	@reelszen_ - 491 followers, 67 posts, Creator account	Bio link becomes the booking destination
Engagement	Warm and loyal - median 186 likes / post	Convert existing warmth instead of chasing cold traffic first
Website / booking link	None	This PRD
Bookings today	Only via the existing bookings number in the Instagram bio	Structured flow + advance payment + automatic confirmation

2 Goals & Non-Goals

GOALS (MVP)

- Turn Instagram profile visits into advance-paid bookings through the website.
- Show one clear promise, public prices, and real work above the fold.
- Block a date automatically when the advance is paid - no double-booking.
- Give the owner instant notification and a simple way to block dates and edit prices.
- Rank for "reel maker in Hyderabad" searches and support Google Business discovery.

NON-GOALS - explicit

- **No mobile app** in any phase of this PRD.
- No user accounts or login, no marketplace, no multi-vendor onboarding.
- No live tracking of creators or reels.
- No blog in MVP. No full-payment mandate - advance model only.
- No borrowed claims or fake numbers - ever.

Borrow the machine.

Never borrow the mask.

Three Hyderabad / India instant-reel leaders were studied live on 4 October 2026. We take their working mechanics, in our own words and branding, and deliberately refuse their scale theatre.

Source	What we borrow	What we do NOT copy
Flashoot flashoot.com	One promise above the fold ("reels delivered in 10 minutes" is theirs - ours is "delivered before the celebration ends"); proof strip directly under the hero; full public price ladder; packages split by occasion with tabs: Instant / Weddings / Luxe / Business.	Their claimed numbers (1,20,000+ reels, 3,000+ partners, 4.9 rating, Shark Tank mention), their branding and copy, their app push, and any live-tracking theatre.
ReelOnGo reelongo.com	Services taxonomy beyond weddings: Social Events / Private Events / Corporate / Creators; an objection-killing FAQ; a named premium tier (their Select starts at Rs. 19,999 + GST / event - ours is ReelsZen Signature).	Their price inconsistency: headline Rs. 1,999 vs checkout Rs. 2,061 + GST. Lesson locked as a rule: ReelsZen shows ONE price from a single source, GST stated upfront, everywhere.
ReelsXpress reelsxpress.com	Cleanest booking mechanics: occasion → package → date and venue → server-shown price → small advance to reserve, balance before shoot; raw footage included; per-occasion SEO pages such as "Haldi, Mehendi and Sangeet Reel Maker in Hyderabad".	Their gap is our opening: they publish no proof numbers or testimonials. ReelsZen will lead with real reviews and real reels - honestly, even while the numbers are small.

The ReelsZen wedge in one line: Flashoot sells scale, ReelOnGo sells coverage, ReelsXpress sells convenience. ReelsZen sells **certainty with emotion** - a smaller, premium, Hyderabad-first team whose reel arrives before the lights go down, booked in 3 minutes on a website that feels like the wedding itself.

Positioning guardrails for all copy

- Never publish a number the owner cannot prove from bookings or reviews.
- Never use a competitor name, logo, screenshot or testimonial on the site.
- Simple English throughout - Hyderabad families and local brands are the audience, not tech buyers.

Midnight Zen - Premium Cinematic

Zen calm plus cinematic wedding warmth plus night-event cinema. Photography and 9:16 reel thumbnails provide the colour and emotion; the interface itself stays restrained so the work looks expensive.

Midnight Ink

#0E0D0B

Primary. Hero and premium section backgrounds, footer, header on dark.

Ivory Silk

#F7F2EA

Surface. Light section backgrounds - the wedding-editorial canvas.

Champagne Gold

#C9A24B

Accent. Prices, dividers, icons, premium tier, hover. Use sparingly.

Deep Marigold

#E07B24

Gradient partner to gold for the ONE primary CTA. Haldi, marigold, festivity.

Zen Sage

#5B6B5A

Secondary. Testimonials, process, success states, secondary buttons.

Muted Brick

#B3402A

Error / urgency only, rarely - e.g. limited slots for a date.

Text: Charcoal plum-brown #241E1A for body on light; Muted Taupe #8A7D6B for captions and secondary text; Ivory Silk #F7F2EA for text on Midnight Ink.

Usage rules - non-negotiable

- **Rhythm:** Dark hero, then light body, then a dark premium / final-CTA band. Cinema first, editorial second.
- **Gold is never body text on ivory** (contrast fails). Gold is for large headings accents, rules, icons and prices at large size only.
- **One CTA style site-wide:** gradient Champagne Gold #C9A24B to Deep Marigold #E07B24, pill shape, label "Book Your Date" (context variants allowed: "Check My Date" in Step 1 only).
- **No purple or blue tech gradients.** That is app-land. ReelsZen is a wedding brand.
- **Motif:** vertical 9:16 reel cards everywhere - hero montage, portfolio, testimonials background, occasion cards.

Typography & motion (guidance)

Display: Fraunces or Playfair Display, 600-700, for headlines - wedding editorial serif. **UI / body:** Manrope or Inter, 400-600, 16px base on web, generous line-height. Prices in the sans, bold, large - never in script fonts. **Motion:** slow, soft fades and gentle parallax only. No bouncy, app-style animation. Reduced-motion preference must be respected.

Five visitors. One must book in minutes.

Person	Arrives from	Needs to feel / do
Bride / groom & family (primary)	Instagram, WedMeGood, Google, referral	"Is my date free? What does it cost? Will it really come tonight?" → Check date, see wedding packages, pay advance.
Birthday / private host	Instagram, Google	Fast, joyful, affordable → Quick Reel / Half Day, same flow, lighter copy.
Brand / store owner	Instagram, referral	Professional, quick turnaround for launches → Business custom quote via contact, portfolio proof.
Venue / planner partner	Direct outreach	Credibility in 30 seconds → About, portfolio, contact. Phase 2: partner enquiry.
Creator applicant	Instagram hiring reels	Phase 2 only: join-the-team page and application form. Not in MVP navigation.

Primary journey - Wedding booking (target: under 3 minutes, mobile)

Instagram bio link → Home hero (promise + "Reels from Rs. 1,999") → tap **Book Your Date** → Step 1 occasion + package → Step 2 date (blocked dates greyed) + venue → Step 3 WhatsApp number → Step 4 summary (advance today, balance before shoot, GST shown) → Razorpay → confirmation screen + WhatsApp message with Booking ID.
Abandon at any step? WhatsApp float with pre-filled date message is the rescue path - never a dead end.

Secondary journeys

- **Just browsing:** Home → Featured Reels → Portfolio filters → Testimonials → Packages → Book. Every reel card carries a small "Book this style" link into Step 1 pre-filled.
- **Price-checker:** Home → Packages teaser → full Pricing page → reserve amount visible per plan → Book.
- **Trust-checker (parents / planner):** About → How It Works → FAQ (videographer objection) → Reviews → Contact / WhatsApp.

Design consequence: 90% of traffic will arrive on a phone from Instagram. Every journey above is designed mobile-first; desktop is the enhancement, not the baseline.

Seven pages. **Nothing bloated.**

MVP sitemap: Home (/) | Packages & Pricing (/packages) | Portfolio (/reels) | Booking (/book) | About (/about) | Contact (/contact) | Legal: Terms, Cancellation & Refund Policy, Privacy (/terms, /refund-policy, /privacy) - legal pages are required for Razorpay approval. Global: header (logo, Packages, Reels, About, Contact + Book CTA), WhatsApp float, footer.

1. Home - the salesperson

- **Hero (dark):** Autoplaying muted 9:16 reel montage (poster frames first, video lazy-loaded), headline exactly in spirit: "Your wedding reel. Delivered before the celebration ends." Sub-line: shot on iPhone, edited on-site in Hyderabad. Price anchor: "Reels from Rs. 1,999". One gradient CTA: Book Your Date. Secondary text link: Watch Reels.
- **Proof strip:** Four slots ONLY - events covered, reels delivered, average delivery time, rating. **Owner to supply true values before launch (TBD-owner). Never ship invented numbers.** Until supplied, show qualitative proof instead ("Same-day delivery - first reel before your event ends") rather than a fake statistic.
- **How It Works (sage section):** 4 steps - 1 Book your date, 2 We shoot on iPhone, 3 Edited on-site, 4 Delivered before the event ends.
- **Occasions grid:** Weddings; Haldi / Mehendi / Sangeet; Birthdays; Brands & Stores; Real Estate; Festivals & Events. Each card: 9:16 image, one line, "from" price where defined, link to Packages with tab pre-selected.
- **Featured Reels:** 6-9 playable 9:16 cards (best work, permission-cleared). **Packages teaser:** 3 cards + link to full pricing. **Testimonials:** real reviews only, first name + event type. **Instagram strip:** @reelszen_ feed. **FAQ teaser:** 3 questions + link. **Final CTA band (dark):** date-led copy + Book CTA + footer with WhatsApp, call (existing bookings number) and Instagram.

2. Packages & Pricing - the honest ladder

Occasion tabs (All / Weddings / Events / Signature / Business) as in Section 8. Per plan: what is included, delivery promise, total price, GST note, reserve advance due today, balance timing. Add-ons listed once, applied consistently. No price may differ from the booking checkout for the same plan - single pricing data source (FR-14).

3. Portfolio / Reels - proof, not decoration

Filterable 9:16 grid: Weddings / Events / Brands / Festivals. Each item opens the reel (hosted video preferred, Instagram embed as fallback) with caption: client first name + event type only. Owner must confirm written permission per reel before publishing; no reel goes live without it.

The booking page is the product

4. About / Why ReelsZen

Founder story in generic, honest terms: started with one iPhone and a belief that your memories should not take two months. Difference section answering the videographer objection in our own words: the photographer and videographer craft the long film; ReelsZen is the missing piece that gets your event online, beautifully, before it is over - you share tonight, they deliver the archive later. Behind-the-scenes photos of on-site editing. No invented credentials.

5. Contact

Short form (name, WhatsApp number, event date, message) with spam protection; WhatsApp deep link; service area: Hyderabad primary, outstation on request with a travel-cost note confirmed per booking; response-time promise only if the owner can keep it (suggest "replies within a few hours on booking days" - owner to confirm).

7. Booking flow - 5 steps, one page, progress always visible

Step	Fields & behaviour
1. Occasion & package	Occasion selector, package cards with total price + advance due. Pre-fillable from Packages / Portfolio links (?package=). Business = divert to Contact / custom quote, no checkout.
2. Date & venue	Date picker: past dates disabled, owner-blocked dates disabled with "This date is full - try WhatsApp for waitlist" message. City (default Hyderabad) + venue name / area (free text). Event start time.
3. Your details	Name, mobile / WhatsApp number (10-digit India validation, OTP NOT required in MVP), email (optional but encouraged for receipt), notes (couple names, functions, special moments).
4. Price summary	Server-calculated, line by line: package, add-ons, GST clearly shown, Advance due today vs Balance due before the shoot . Cancellation / reschedule policy shown and acknowledged (checkbox) BEFORE payment.
5. Pay advance	Razorpay checkout (UPI, cards, netbanking). On success: confirmation screen + WhatsApp + email with Booking ID, date, package, venue, advance paid, balance due. On failure: booking held as "Payment Pending" for 30 minutes, retry link sent, date NOT blocked.

Date-lock rule: A date is blocked for others only when the advance payment succeeds. One wedding / full-day booking per date per team capacity set by the owner in admin - if capacity is 1, the date closes after one paid wedding booking. Partial / event bookings follow the owner capacity setting. No manual override may create a double-booking without a visible warning.

Public prices. No DM-for-price.

Owner-approved defaults below (from the verified market ladder and the ReelsZen Playbook). All prices in INR, shown with a clear "+ GST" note wherever GST applies - the final tax treatment is an owner / accountant decision in Section 17. The website, Instagram and checkout must all read from this one table.

Plan	Price	Includes	Reserve advance*
Quick Reel - Events	Rs. 1,999	1 hour, 1 edited reel, 3 photos, same-day delivery	Rs. 699
Half Day - Events	Rs. 4,999	Up to 3 hours, 2 reels, 10 photos, same-day delivery	Rs. 1,099
Wedding - Single Event	Rs. 14,999	3 reels, raw footage included, delivered before event ends / same day	Rs. 3,799
Wedding - 3 Events	Rs. 44,999	10 reels across 3 events, raw footage included	Owner to confirm %
Wedding - 4 Events	Rs. 59,999	15 reels across 4 events, raw footage included	Owner to confirm %
ReelsZen Signature - Premium	Rs. 19,999 / event	Top creator / director-led shoot, cinematic grade, priority delivery	Owner to confirm %
Business / Brands	Custom quote	Store launches, brands, real estate - scoped per brief via Contact	Per quote

*Reserve advances for event and single-wedding plans are PROPOSED defaults mirroring the advance-to-reserve pattern in the market; the Playbook principle is that a wedding date is blocked on advance payment (suggested 50% for multi-event wedding packages). Owner must approve every advance amount in Section 17 before launch. Balance is due before the shoot unless the owner sets otherwise in the policy page.

Add-ons (proposed, owner to approve)

- Extra edited reel - Rs. 1,299. Extra hour of coverage - Rs. 1,299. Raw footage - **included** on wedding plans (state it proudly; do not upsell what is promised free). Additional add-ons (second creator, express second-day film) only if the owner can deliver them reliably.

9 Content Requirements

- **Reels:** Minimum 12 permission-cleared reels at launch (6 weddings minimum if available, else best events), each with poster frame, caption and occasion tag. Hosted MP4 (compressed, 9:16) preferred; Instagram embed fallback.
- **Photos:** BTS on-site editing shots, team-at-work shots, hero montage stills - real ReelsZen work only. No stock wedding photography presented as own work.
- **Copy deck (owner-approved before build sign-off):** hero, How It Works, occasion descriptions, package inclusions, About story, 8-10 FAQs (delivery time, iPhone quality, raw footage, travel, reschedule, balance timing, videographer difference, booking lead time), policy pages.
- **Reviews:** Collect from past clients before launch; publish with first name + event type. Zero reviews at launch is acceptable - fake reviews are not.

Numbered. Testable. MoSCoW-prioritised.

ID	Requirement	Priority
FR-1	Responsive, mobile-first site; all flows completable one-handed on a phone.	Must
FR-2	5-step booking flow per Section 7 with progress indicator, back-edit without data loss, and pre-fill via URL parameters.	Must
FR-3	Server-side price calculation; client can never alter price, advance or GST in the browser.	Must
FR-4	Razorpay checkout for advance (UPI / cards); webhook-confirmed success before date is blocked.	Must
FR-5	On paid success: Booking ID generated; confirmation screen + WhatsApp message + email to customer; instant notification to owner (WhatsApp and/or email).	Must
FR-6	Booking record stored in database / structured sheet: ID, name, contact, occasion, package, add-ons, date, venue, amounts, status.	Must
FR-7	Date availability: blocked dates and paid bookings disable dates in the picker in real time.	Must
FR-8	WhatsApp float on every page; pre-filled message includes page / selected date where known.	Must
FR-9	Contact form with spam protection (honeypot / CAPTCHA) and owner notification.	Must
FR-10	Portfolio filters + in-page reel playback without leaving the site where hosted.	Must
FR-11	Instagram feed strip / embeds on Home linking to @reelszen_.	Should
FR-12	Abandoned-booking recovery: payment-pending record + retry link by WhatsApp / email.	Should
FR-13	Google Maps service-area display on Contact (Hyderabad + outstation note).	Should
FR-14	Single pricing data source feeding Packages page, booking steps and summaries.	Must
FR-15	Gift-a-Reel enquiry, waitlist for full dates.	Could (P2)

Acceptance for every Must FR is demonstrated on a real phone on 4G, with a live (test-mode first, then low-value live) Razorpay transaction, before launch sign-off.

Premium dies if it loads slowly

11 Non-Functional Requirements

- **Performance:** Largest Contentful Paint under 2.5s on 4G mobile; compressed images (WebP), poster frames before any video loads, no autoplay with sound, total hero weight budgeted and tested.
- **Accessibility:** Gold never as small body text on ivory; minimum contrast for body text; tap targets 44px+; alt text on images; keyboard-navigable forms; respects reduced motion.
- **Reliability & security:** HTTPS everywhere, daily backup of booking data, payment handled only by Razorpay (no card data touches the site), form validation server-side, privacy policy honoured in data handling.
- **Compatibility:** Latest Chrome / Safari on Android and iOS (the Instagram in-app browser is a first-class test target - the booking flow MUST work inside it, with a "open in browser" fallback if Razorpay requires it).

12 Admin / Operations

- **Admin-lite is acceptable for MVP:** a protected sheet or simple admin panel where the owner can (a) block / unblock dates, (b) edit package prices, advances and add-ons (single source, FR-14), (c) add / remove portfolio reels and testimonials, (d) toggle a package on/off, (e) view and export bookings, (f) mark balance paid.
- **Single source of truth for dates:** the booking system calendar - not a separate diary. Owner notifications on every new paid booking, payment-pending booking, and contact enquiry.
- **Ops routine:** owner checks blocked dates weekly in peak season; reviews pending payments daily; reconciles Razorpay settlements weekly.

13 Payments

Provider: Razorpay (checkout + payment links as fallback). **Model:** advance to reserve, balance before the shoot.

Required before go-live: Razorpay business verification, Terms / Refund / Privacy pages live, GST treatment confirmed, test-mode end-to-end run, then one low-value live transaction. Refunds follow the published Cancellation & Refund Policy only - the policy text is owner-approved (Section 17), the website merely displays and enforces it. Every payment state is explicit: Paid Advance / Payment Pending / Balance Due / Fully Paid / Cancelled / Refunded.

14 SEO & Analytics

- **SEO basics:** Unique titles / descriptions using "Reel Maker in Hyderabad" patterns (e.g. "Instant Wedding Reel Maker in Hyderabad - ReelsZen"); LocalBusiness + FAQ schema; sitemap + robots; Google Business Profile linked and consistent (name, area, existing bookings number); fast, mobile-first pages as a ranking input.
- **Analytics from Day 1:** GA4 + Meta Pixel. Events: ViewPackage, StartBooking, BookingStepComplete (per step), AdvancePaid (with value), WhatsAppClick, ContactSubmit. Weekly owner view: visits, Instagram-referred share, booking starts, paid bookings, conversion rate.

Ship small. Ship premium. Then grow.

15 Launch Scope

MVP - PHASE 1 (launch)

- Home, Packages, Portfolio, Booking with Razorpay advance, About, Contact, legal pages
- WhatsApp float, admin-lite (sheet-based acceptable), GA4 + Meta Pixel
- Instagram bio link switched to the website on launch day

PHASE 2 (after MVP is stable)

- Per-occasion SEO landing pages: "Wedding Reel Maker in Hyderabad", "Haldi Mehendi Sangeet Reels Hyderabad", "Birthday Reels Hyderabad", "Brand & Store Launch Reels Hyderabad" - template: hero, 3 reels, mini price, FAQ, booking CTA
- Testimonials engine / Google reviews widget; Creator-join (hiring) page; Gift-a-Reel; Telugu-language landing variant test

16 Success Metrics

Metric	Target / use
Booking conversion (visits to AdvancePaid)	3-5% - the headline number, reviewed weekly
Advance-paid bookings / month	20+ by Month 3 (aligns to the Playbook 90-day scoreboard)
Traffic from Instagram bio link	Tracked share; expect the majority at launch
Page speed	LCP under 2.5s on 4G - re-test monthly
Reviews (Google Business + website combined)	30+ in 90 days, all genuine

Risks: Double-booking - single calendar + advance locks date. Fake proof - only true numbers. Price inconsistency - single source (FR-14). In-app payment friction - test early, WhatsApp fallback.

17 Open Questions - Owner to Confirm Before Build

1. Final prices, GST treatment (inclusive / + GST) and every reserve-advance amount, including % for 3- and 4-event wedding packages and Signature.
2. Cancellation, reschedule and refund terms (suggested starting point: advance blocks the date; reschedule once free if date is available - owner to set windows and refund %).
3. WhatsApp number for the float, confirmations and notifications, and the business email for receipts - **to be supplied by the owner; intentionally not printed in this PRD**. Confirm whether the existing bookings number in the Instagram bio is the same number.
4. True proof-strip numbers (events, reels, delivery time, rating) - or approve launching with qualitative proof only.
5. Domain name, Razorpay readiness, Google Business Profile status, team capacity per date.
6. Launch reel selection (12+) with permissions, testimonials, and final logo file.

Builder's sign-off test: On a phone, from the Instagram bio link, a first-time visitor can understand the promise in 10 seconds, see an honest price in 30 seconds, and pay an advance that locks their date in under 3 minutes - and the site still feels like a luxury wedding brand while they do it. If all four are true, ship it.
